Dear Mr. Chairman:

This report responds to your request that we review all Department of Defense (DOD) research and development contracts and grants awarded to colleges, universities, consortia that include colleges or universities, and/or college or university trusts by DOD to determine compliance with the restrictions, notice, and reporting requirements in 10 U.S.C. 2361. As agreed with your staff, this report focuses on fiscal year 1993 awards and includes data on related organizations, such as university-affiliated laboratories, that are not subject to section 2361.

Background

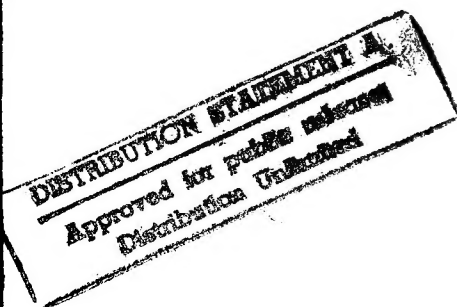

In 1988 Congress enacted 10 U.S.C. 2361. As amended, this law requires, among other things, that the Secretary of Defense report to the Senate and House Committees on Armed Services on the use of competitive procedures in awarding research and development contracts to colleges and universities. Generally, the reports are to list the colleges and universities that received more than \$1 million in noncompetitive contracts and the cumulative amount of such contracts these colleges and universities received. The law did not require DOD to prepare reports after December 31, 1993. However, the National Defense Authorization Act for Fiscal Year 1995 extended the reporting requirement.

The law also requires the Secretary of Defense to notify Congress in writing of certain proposed noncompetitive contract and grant awards and to wait 180 days before making these awards. The notification and waiting period requirements have continued uninterrupted since 1988.

Results in Brief

DOD awarded about \$2.17 billion—\$1.4 billion in contract funding and \$769 million in grants—for research, development, test, and evaluation (RDT&E) to colleges, universities, and other organizations (including university-affiliated laboratories) in fiscal year 1993. DOD's data shows that about \$1 billion of these contract actions and about \$75 million in grants were noncompetitive.

DTIC QUALITY INSPECTED

DOD has not fully complied with 10 U.S.C. 2361 reporting requirements in that it only submitted the required reports for 1989 to 1991, and not for 1992 or 1993. Section 2361 does not require DOD to disclose all noncompetitive DOD RDT&E awards to colleges, universities, and related organizations in the mandated reports because it excludes funding under \$1 million and excludes awards to affiliated organizations such as research laboratories.

10 U.S.C. 2361 notification and waiting period requirements only apply under very limited circumstances. As a result, DOD has not had to notify Congress or wait 180 days before making any of its noncompetitive awards and, according to DOD officials, has not done so.

DOD Awarded Over \$2 Billion for RDT&E to Colleges, Universities, and Related Organizations in Fiscal Year 1993

DOD awarded thousands of contracts and grants to U.S. educational and other related organizations (including university-affiliated laboratories) for RDT&E in fiscal year 1993. This funding amounted to about \$2.17 billion.¹ Data we obtained from DOD shows that contract actions accounted for \$1.4 billion of the awards, while grants accounted for \$769 million. Table 1 shows the 10 university-related organizations that received the most contract and grant funding from DOD for RDT&E in fiscal year 1993. These 10 recipients account for 54 percent of the value of the awards in this study, 70 percent of the value of contract funding, and 24 percent of the value of grants.

Appendix I lists the colleges, universities, and other related organizations receiving DOD RDT&E funding in fiscal year 1993 and specifies the unit or location of recipients. Appendix II provides summary data on which services and DOD agencies provided RDT&E funding to these recipients.

¹DOD also awarded over \$3 million in contract funding (over \$500,000 noncompeted) to foreign educational organizations for RDT&E in fiscal year 1993.

Table 1: Top 10 Colleges, Universities, and Related Organizations Receiving DOD Contract and Grant Funding for RDT&E in Fiscal Year 1993

Dollars in thousands

Organization	Contract funding	Grants	Total funding
Massachusetts Institute of Technology	\$359,905	\$42,187	\$402,092
Johns Hopkins University	238,325	5,705	244,030
Pennsylvania State University	84,056	12,563	96,619
University of Texas System	62,818	17,201	80,019
University of California System	15,017	61,516	76,533
Illinois Institute of Technology	62,342	1,793	64,135
Carnegie Mellon University	53,845	9,206	63,051
Charles Stark Draper Laboratory	53,260	0	53,260
University of Pittsburgh	42,460	4,230	46,690
Stanford University	11,649	26,496	38,145
Total	\$983,677	\$180,897	\$1,164,574

Note: Table includes data on university-affiliated laboratories.

Most Contract Actions Were Not Competed, but Most Grants Were

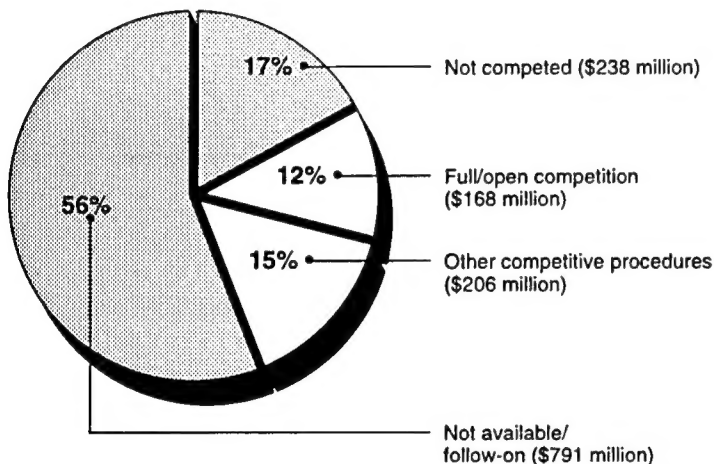

The majority of the \$1.4 billion fiscal year 1993 RDT&E contract actions to colleges, universities, and other related organizations (including foreign) were not competed: about \$791 million (56 percent) in contract actions were not available for competition or were follow-ons to previously competed actions, and about \$238 million (17 percent) in contract actions were not competed. DOD awarded about \$206 million (15 percent) using competitive procedures other than full and open competition. DOD made only about \$168 million (12 percent) in contract actions through full and open competition.

With regard to grants, according to information provided by contracting personnel on DOD's grant action report, only eight of its fiscal year 1993 grants to educational organizations did not meet DOD criteria as competed grants. DOD officials also told us that all of its RDT&E grants are competed unless they are made under statutory earmarks that specifically supersede section 2361. These grants accounted for about \$75 million, or 9.75 percent, of the value of fiscal year 1993 grants. In February 1994, DOD instructed grants officers to use broad competition to the maximum extent feasible and practicable by requiring, at a minimum, at least two eligible prospective proposers.

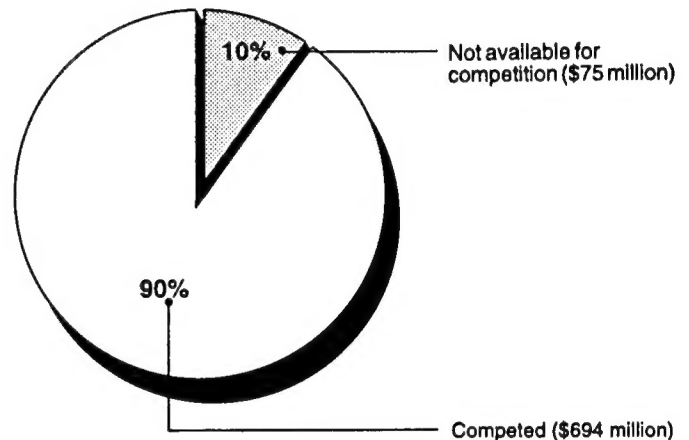

Figure 1 shows the proportion and amount of competitive and noncompetitive DOD RDT&E funding for colleges, universities, and other related organizations in fiscal year 1993, and appendix I lists complete data for fiscal year 1993 contracts and grants.

Figure 1: Level of Competition in DOD RDT&E Funding for Colleges, Universities, and Other Related Organizations (Including Foreign) in Fiscal Year 1993

Dollar value of contract actions

Dollar value of grants

Note: Figure includes data on university-affiliated laboratories. Not available/follow-on value includes contract actions not available for competition or follow-ons to previously competed actions.

DOD Did Not Submit All of the Reports Required by 10 U.S.C. 2361

Congress enacted 10 U.S.C. 2361 in 1988 and amended the statute in 1989, adding a requirement that DOD submit reports to the Senate and House Committees on Armed Services for the award of research and development contracts, and the award of construction contracts, to colleges and universities. Initially, the law did not require DOD to prepare reports after December 31, 1993. DOD submitted five semiannual reports covering the period July 1989 to December 1991 but did not submit reports for 1992 or 1993.² A DOD official told us he failed to prepare these reports

²The 1989 amendment (P.L. 101-189, 252(a)) called for semiannual reports. A 1990 amendment (P.L. 101-510, 1311(4)(A)) required annual reports, and the most recent amendment (P.L. 103-337, 813) continues the annual reporting requirement.

because of staff changes and because other projects took priority over preparing the reports.

The five reports DOD did submit included statistics on the level of competition in some DOD contracts. For selected colleges and universities receiving over \$1 million in noncompetitive RDT&E contracts, the reports show the number and dollar amount of contracts competed, contracts not competed, contracts not available for competition, and follow-ons to previously competed actions.

The National Defense Authorization Act for Fiscal Year 1995 extends this reporting requirement indefinitely, and the accompanying Senate report calls for DOD to submit the 1992 and 1993 reports. In November 1994, a DOD official told us that he had begun preparing these reports. A November 1994 memorandum from the Secretary of Defense assigned responsibility for producing subsequent reports to the Under Secretary of Defense for Acquisition and Technology.

Law Does Not Require Reports to Include Complete Information

In the reports prepared pursuant to 10 U.S.C. 2361(c)(1), DOD was not required to include information on university-affiliated entities, such as certain research laboratories and other related organizations. For example, the five reports do not show the funding Johns Hopkins' Applied Physics Lab received; in fiscal year 1993, the Applied Physics Lab received about \$235 million in noncompetitive contracts actions.

Furthermore, 10 U.S.C. 2361(c)(1) does not require DOD to include grants in the mandated reports—even though grants are a major focus of the law. DOD awards some grants on a noncompetitive basis, in accordance with statutory earmarks that explicitly supersede section 2361. For example, in fiscal year 1993 DOD awarded eight noncompeted research and development grants to colleges and universities, totaling about \$75 million. A Senate Report accompanying the National Defense Authorization Act for Fiscal Year 1995 calls for DOD to continue including information on grants, as well as contracts, in the required reports, although DOD has not included grants in its previous reports.³

³Senate Report 103-282 to accompany S. 2182, the National Defense Authorization Act for Fiscal Year 1995.

Reports compiled by DOD's Washington Headquarters Services (WHS) include information on contracts and grants.⁴ However, these reports do not address the level of competition in awarding the contracts and grants, although such information is readily available in DOD's databases. Appendix I shows a sample report we developed using fiscal year 1993 data available from WHS.

Notification and Waiting Period Requirements Are Generally Inapplicable

10 U.S.C. 2361(b)(2) establishes congressional notification and waiting period requirements for certain noncompetitive DOD awards to colleges and universities. The subsection provides that a grant may not be made, or a contract awarded, pursuant to a provision of law that authorizes or requires the making of the grant, or the awarding of the contract, in a manner inconsistent with the competition requirements of 10 U.S.C. 2361(a) until the Secretary of Defense notifies Congress and waits 180 days.⁵

DOD officials told us that most, if not all, DOD RDT&E contract and grant actions to colleges and universities are not subject to these notice-and-wait requirements. Basically, this is because most RDT&E contracts and grants to colleges and universities are either competed or awarded noncompetitively under an exemption to competition recognized by section 2361(a) (e.g., certain sections of the Competition in Contracting Act). DOD officials believe that there have been no instances where notification and a waiting period were required, and DOD has not notified Congress or waited 180 days prior to making any awards in fiscal year 1993.

Conclusions and Observations

Although DOD complied with 10 U.S.C. 2361 when it provided reports for 1989 through 1991, these mandated reports did not disclose all noncompetitive RDT&E awards to educational and other related organizations. The reports only provide information on contracts and exclude millions of dollars in grants. The reports do not include certain related organizations, nor do they include complete information on contract awards because the law requires reporting only on colleges and universities receiving over \$1 million in noncompetitive contracts. Our

⁴WHS, a DOD office that collects data on contract and grant activities, produces the yearly report Educational and Other Nonprofit Institutions Receiving DOD Prime Awards of Contracts, Grants, and Agreements for RDT&E.

⁵A congressional earmark in a committee report is not a "provision of law." We found earmarks in House Report 102-1015 (the Conference Report to accompany H.R. 5504, Making Appropriations for the Department of Defense for the Fiscal Year Ending September 30, 1993, and for Other Purposes).

analysis shows that the mandated report for 1993 would exclude about \$11 million in contracts under \$1 million to colleges and universities. Furthermore, the section requires DOD to report contract activity on a calendar year basis. This is inconsistent with other government reports on educational awards and is inconsistent with the reports WHS compiles on a fiscal year basis.

If desired, Congress could obtain more complete information about noncompetitive awards from WHS. For example, current WHS reports contain information on DOD RDT&E awards (contracts over \$25,000, as well as grants regardless of dollar value). The reports also include, among other things, information on organizations related to colleges and universities, including university-affiliated laboratories. These reports cover fiscal years rather than the calendar years section 2361 reports must cover.

DOD officials said that although these WHS reports do not provide information on the competitive procedures DOD uses in making awards, such information is available in their databases. WHS could enhance its existing reporting format by adding information on competition. With minimal burden, such revised reports could further disclose DOD's RDT&E funding activity. We have provided an example of such a reporting format in appendix I.

Scope and Methodology

To determine DOD compliance with 10 U.S.C. 2361, we obtained information on its reports from the Office of the Secretary of Defense and cognizant DOD officials. We also reviewed the law's requirements and obtained an interpretation of the law from DOD's Office of the General Counsel. To assess the types and amounts of DOD awards for RDT&E, we analyzed data from DOD's contracts (DD350) database and from the WHS grants database. Using this information, we developed the awards report shown in appendix I. We were unable to analyze separately all funding to related organizations because of the way DOD data was aggregated.

As agreed with your staff, we did not obtain written comments from DOD on a draft of this report. However, we discussed our findings and conclusions with DOD officials. DOD explained that many of the "related organizations" listed in the report (such as university-affiliated research laboratories) routinely receive noncompetitive contracts in full compliance with applicable laws and regulations. In addition, DOD officials stated that all DOD RDT&E grants to the types of organizations discussed in the report are competed unless they are statutory earmarks. We revised

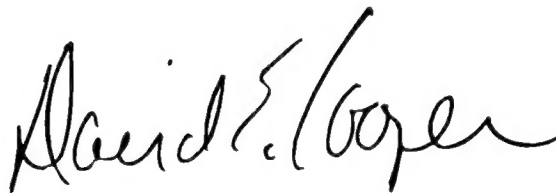

the report where appropriate in response to this and other information provided by DOD officials.

We conducted our review between July and December 1994 in accordance with generally accepted government auditing standards.

We are sending copies of this report to other appropriate congressional committees and the Secretary of Defense. We will also make copies available to others on request.

Please contact me at (202) 512-4587 if you or your staff have any questions concerning this report. Appendix III lists the major contributors to this report.

Sincerely yours,

A handwritten signature in black ink, reading "David E. Cooper". The signature is fluid and cursive, with the first name "David" being the most prominent.

**Appendix I
DOD Funding for RDT&E for Colleges,
Universities, and Other Related
Organizations in Fiscal Year 1993**

^aThis listing corresponds to an entry in WHS reports; we were unable to further identify the organization.

^bDomestic contracts subtotal is \$1,400,160,000, or 65 percent of funding; domestic grants subtotal is \$768,612,000, or 35 percent of funding.

^cOf contract actions, 17 percent were not competed.

^dOf contract actions, 12 percent were competed with full and open competitive procedures.

^eOf contract actions, 15 percent were competed with other competitive procedures.

^fOf contract actions, 56 percent were not available for competition or were follow-ons to previously competed actions.

^gOf grants, 10 percent were not available for competition.

^hOf grants, 90 percent were competed.

ⁱOf foreign contract actions, 17 percent were not competed.

^jOf foreign contract actions, 28 percent were competed with full/open competitive procedures.

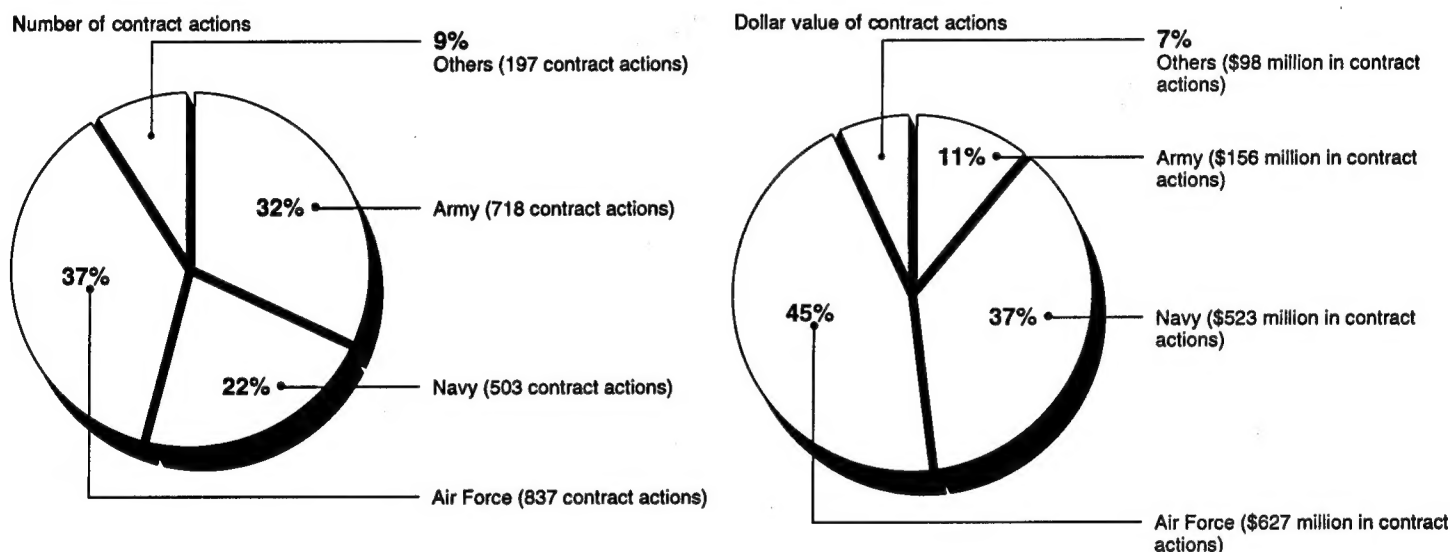

^kOf foreign contract actions, 55 percent were competed with other competitive procedures.

Note: Columns and rows may not total due to rounding.

DOD Agencies Awarding Contracts and Grants to Colleges, Universities, and Other Related Organizations (Including Foreign) in Fiscal Year 1993

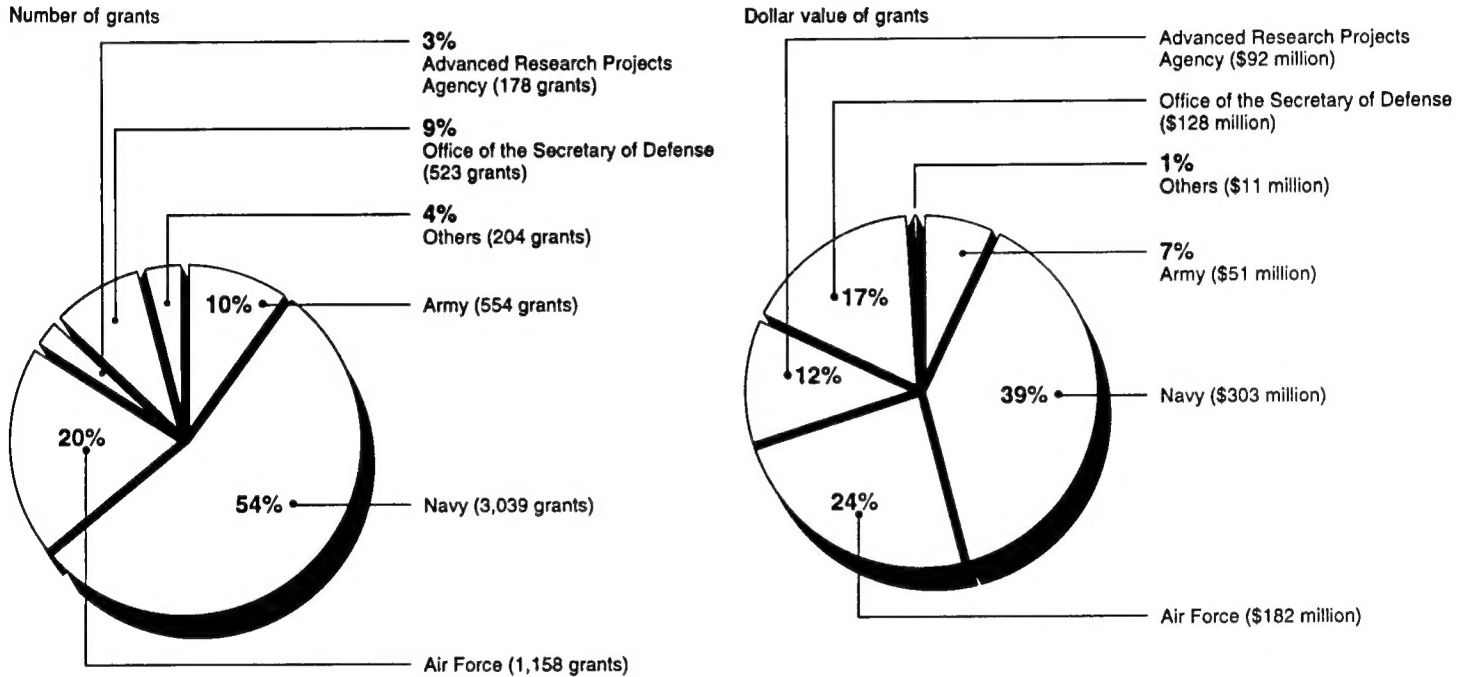

Figures II.1 and II.2 show the DOD agencies awarding contracts and grants to colleges, universities, and other related organizations (including foreign recipients) in fiscal year 1993. The figures on the left show the number of award actions in fiscal year 1993, while figures on the right show the value of those actions. In fiscal year 1993, the Air Force awarded the most contract dollars, \$627 million, while the Navy awarded the most grant dollars, \$303 million.
